

**Who we are**

IQuest Internet, LLC, provides a comprehensive range of Internet solutions for eBusinesses, online service providers and residential customers. IQuest's Internet solutions consistently help businesses increase their productivity and profitability. IQuest offers a complete line of customized programs to ensure seamless services for our customers. Our strong partnerships with leading telecommunications and networking companies ensure that our customers can take advantage of the most advanced Internet technology. And, customer support is available 24 hours a day, 7 days a week.

**IQuest Firewall Service****"state of the art solutions"****IQuest Firewall**

IQuest is now pleased to offer a shared Firewall solution to our customers. Whether you own your own server or are a leased server customer, we can offer security solutions for a fraction of the cost.

We've designed our Shared Firewall product to provide for all your basic security needs at a competitive price.

**What is a Firewall and why do I need one ?**

A firewall is a device that sits on the network between your server and the Internet. Its purpose is to act as a protective gateway – allowing only authorized traffic to flow to and from your server.

The firewall inspects traffic and based on a set of rules, decides whether the traffic should be allowed through, rejected or ignored.

A typical use for a firewall would be to allow traffic through only for specific services – for example web or email services – and reject all others. This would be a basic means of preventing unauthorized access to services, which an intruder might exploit. Another possibility is to restrict access to certain services only to users with approved IP addresses.

**Key features and benefits**

- Available for dedicated and leased Server solutions
- 24/7 Monitoring
- 24/7 Technical Support
- Access to the Security Team Specialists
- By implementing a firewall solution, you will protect your business against lost productivity and downtime caused through malicious access.
- Ensures maximum uptime for valuable corporate servers, by reducing security risks.
- Affordable solution for small companies, which cannot justify the expense of a dedicated firewall solution.
- Housed in IQuest's highly resilient Data Center

**Standard Firewall Configuration**

HTTP	VNC	DNS
HTTPS	PPTP	MSSql
POP3	SMTP	FTP
SSH	PCAnywhere	MySQL
ICMP-Ping	Winmedia	Terminal Services

**Affordable**

A system consisting of a single server can be full protected for as little as \$79 per month. Modular pricing remains reasonable for future growth or more complex applications.
